REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reason for allowance.
2. Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-84 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, . . . the inventor's lexicography must prevail . . ." *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.
3. The closest prior art Levchin et al (U.S. PG Pub 2006/0253340) which discloses a method for transacting through a communication network. JP2002/042030 A, Saotome, Morihiro discloses a method for preventing a trouble and a crime caused by abuse of ID and password of another person or a wicked seller. However, neither Levchin nor Saotome singularly or in combination discloses the recited feature:
4. As per claims 1, 3, 66 and 77 "a transaction apparatus communicating with said first and second terminals through the communication network, said transaction apparatus storing said unique ID information of said second terminal in advance, said transaction apparatus setting up and sending a transaction ID information to said first terminal, said transaction apparatus receiving from said second terminal said unique ID

information of said second terminal together with said transaction ID information, said transaction apparatus performing the transaction by synchronizing a communication with said first terminal and said second terminal when said unique ID information received from said second terminal is identical with that stored in said transaction apparatus in advance previously and when said transaction ID information received from said second terminal is identical with that set up by said transaction apparatus and sent to said first terminal, wherein said first and said second terminals send and receive messages therebetween via the transaction apparatus during synchronizing”.

The word “unit has been changed to “device” and therefore making it 101 ok.

EXAMINER’S AMENDMENT

5. Please amend claims 1, 3-11, 52, 53, 66-71, 77, 101-106, 110-112, 116-118 as follows: see., attached.

Claims 107-109 and claims 113-115 are canceled.

Authorized by Matthew Siegal Reg. No. 32,941.
